

Full Stack Development Intern Assignment

Build a Full-Stack Project Management Application

Objective

Build a functional **full-stack web application** that allows teams to create projects, manage tasks, collaborate with team members and track project progress.

The objective is to evaluate your ability to work across the complete application stack:

Frontend → Backend → API → Database → Authentication → Deployment

You may choose your own technology stack.

Suggested Product

NOVA — Team Productivity Platform

Tagline

Plan. Collaborate. Deliver.

NOVA is a project management platform for teams to manage projects, tasks, members and productivity from a single application.

You may use your own company/product name and branding.

Recommended Technology

You may use any modern full-stack technology.

Frontend

Examples:

- React
- Next.js
